Exercise 6.1

Consider the constraint graph G of Exercise 5.1 (the crossword puzzle). Compute the tree-decomposition of G using the elimination ordering of the min-fill heuristic. How could one solve the problem with the resulting tree-decomposition?

Answer the following questions:

1. What is the width of the particular tree-decomposition?
2. How big is the search space of G ?
3. How big is the search space for the tree-decomposition?
